PLACEMENT DRIVE NOTIFICATION

Company	Techera
About the Company	<p>TechEra Knowledge and Careers is an educational technology start-up that helps students discover and pursue their passion. It was born out of glitches and phone calls from college rooms where a few students who realized that a lot of people were not doing what they were interested in and were doing something they were forced to take up. We saw that happening around us and this really affected their mental states, confidence and moral. Yet, sadly no body was doing anything about this. So this is why we decided to start a company and to help all the students by providing them proper guidance and assistance so that they can achieve what they are aiming for in their carrier. We have launched many initiatives from many live interactive session's to the citywide events.</p> <p>Through TechEra we connect young achievers, with outstanding achievement in the field of their passions with young college and high school students who wish to pursue the same dream. We connect aspiring novelist with young published authors, we connect aspiring entrepreneurs with young successful entrepreneurs, thus giving these students a chance to interact with their role models and plan their lives ahead under the guidance of these young mentors.</p>
